**CLAIMS 1, 3-8 AND 10-55 ARE PRESENTED FOR**

**EXAMINATION**

**DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, 3-8, 10-34 and 42-55, drawn to a method of inhibiting hyperproliferation of malignant or neoplastic cells, classified in class 514, subclass 167.
- II. Claims 35-41, drawn to kits, classified in class 435, subclass 810 and/or 975.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are different since they have acquired a separate status in the pharmaceutical arts and have different functions. A search of the medical literature would be an undue burden on the examiner.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 305-1877.
